

Xinyi Liu

585-503-0368 • xliu118@uw.edu

EDUCATION

University of Washington

Master of Science, Computational Linguistics

Seattle, WA

Anticipated 2026

University of Rochester

Bachelor of Science, Major in Data Science, Minor in Mathematics

Rochester, NY

May, 2024

Bachelor of Arts, Major Psychology

May, 2024

RESEARCH

University of Washington

Research Assistant - Survey on Automated Claim Verification

Seattle, WA

Mar till now, 2025

- Conducted an extensive literature review of papers on automated claim verification
- Led a case study in claim decomposition strategies, identifying open challenges in the field
- Synthesized methods into a comprehensive survey paper, **A Systematic Survey of Claim Verification: Corpora, Systems, and Case Studies**. Accepted to Findings of Conference on Empirical Methods in Natural Language Processing (EMNLP), 2025

University of Rochester Medical Center

Research Assistant - Dongmei Li Lab

Rochester, NY

Dec, 2022 - May, 2024

- Applied sentiment analysis and topic modeling with NLP techniques, including LDA and BERT
- Conducted thorough data analysis by interpreting the results of NLP models, identifying patterns, and drawing meaningful conclusions to inform future research
- Resulted in paper: **Public Perceptions of Very Low Nicotine Content on Twitter: Observational Study**, published on JMIR (Journal of Medical Internet Research), 2024

PROJECTS

University of Washington

Follow-up study on Survey on Automated Claim Verification

Seattle, WA

July till now, 2025

- Extending prior survey work by investigating linguistic differences between artificial and real-world claims in claim verification datasets
- Exploring implications for improving dataset design in automated fact-checking research

Language Models as proxy in Understanding Human Language Acquisition

Mar - May, 2025

- Conducted an in-depth literature review synthesizing current research on using large language models as proxies for studying human language acquisition
- Analyzed how architectural inductive biases and training data constraints affect models' ability to replicate child language learning phenomena

EXPERIENCES

University of Rochester - Goergen Institute for Data Science

UR Biomedical Data Science Hackathon

Rochester, NY

August, 2022

- 1st place in Undergraduate division in a team of 4
- Developed machine learning models to predict gene expression differences based on various features of genome sequences

SKILLS

- Python, R, SQL
- Machine Learning and Data Analysis, Natural Language Processing
- TensorFlow, PyTorch, scikit-learn
